Per our conversation today, I circulated your survey form to the members of the Federal Women's Program Board and the consensus was that it is comprehensive.

A suggestion was made that a short sentence be added between Paragraphs 9 and 10 to explain that the Agency's first effort is directed at the 3 to 5 year group, rather than at the 3 and under group because of the additional legal and health requirements involved in the care of young babies.

The Board would also appreciate being included in the first paragraph since the possibility to establish a child care center was one of the subjects that the Board discussed when we met with the DCI.
